

2b Acting

App Development Service.

Let us show you how to make money from Apps.

2b Acting

WE DEVELOP APPS FOR YOU - A new way to reach customers

Make money from Apps.

Apps (small software modules) have become a runaway success for businesses such as Apple and Google but they also provide real opportunities for you to make money.

On April 29, 2009, Apple's App Store surpassed one billion App downloads and the download rate continues to grow. In addition to Apple's App Store, there is Google's Android Apps Market, the Ovi Store and now Windows Phone Marketplace providing easy access to Apps across the widest range of devices.

The number of devices sold that use Apps is set to triple over the next couple of years and more importantly, the term 'App' has become a household word now known by billions.

With the clear want for Apps and the growing number of marketing outlets available how can you take advantage?

This is where 2b Acting's App Development Service comes in.

2b Acting's App Development Service assist you in deciding the type of App you need, then produce it, distribute it and work to drive traffic to download it. - A one-stop-shop so that you get the most from your App to benefit your income stream.

Examples of how 2b Acting's App Development Service can assist in raising your income:

- App downloads. The right App can attract, connect and engage consumers. 2b Acting can assist you in developing the right App.

Everything from news and books, to banking and travel. Income can be derived directly from App downloads.

- Broaden your Market. Apps can extend your reach and help grow and maximise awareness of your brand, products or services. 2b Acting can get your App in the most popular markets and on the widest range of devices.
- Generate new revenue stream. Apps provide other revenue sources such as subscription service to articles, credits for gaming, membership to clubs, etc. 2b Acting can advise and setup Apps to turn your content, product or service into viable App income streams.
- Improve business efficiency. You can use the functionality of Apps in many ways to improve what you do. As examples:
 - you can simplify how you get information from databases or documents making information easier to find.
 - you can utilise google maps service so you keep track of where things are.
 - you can provide remote connectivity so you can work on the move.

In fact, there are a number of modifications that can be introduced and 2b Acting can show you what's possible so that you save or make more money.
